

Phillips Clinic

Family Practice Wellness & Anti-Aging Medicine

Be well. Stay well. Age well.

PC FOCUS

Support for Clarity and Motivation

Clinical Applications

- Supports Healthy Brain Magnesium Levels
- Promotes Concentration, Mental Clarity, and Focus
- Supports Cognitive Health
- Promotes Mental and Physical Energy and Motivation to Exercise

*Provides a unique blend of patented, stimulant-free, non-habit forming ingredients. Methylcobalamin supports cognition and contributes to healthy energy metabolism; magnesium L-threonate supplies highly bioavailable magnesium to the brain, which is vital to cognitive function; and theacrine promotes mental and physical energy, focus, and motivation.**

Discussion

Cognition, including learning and memory, is dependent upon neurons in the human brain communicating with each other through synaptic connections. Age, genetics, diet, exercise, and environment may affect how efficiently neurons communicate and, thus, overall cognitive health. Individuals who desire improvement in focus and motivation often look for formulas that target cognitive health, and these often contain ingredients that promote brain stimulation. PC Focus contains a targeted blend of key ingredients designed to promote mental and physical energy and fuel motivation and clarity without overstimulation.
